JUNE 26 2009 IN THE NET!

Westview Marina 2008 Salmon Head Recovery Program Results

COHO 181 - Canadian fish 140 - 77.4%
USA fish 41 - 22.6%

CHINOOK 103 - Canadian fish 62 - 60.2%
USA fish 41 - 39.8%

Coho: 61.9% of the Canadian fish were from Vancouver Island stocks. Of that 73.2% were from the Conuma Hatchery.

Coho: USA stocks varied from 1 per area to a high of 8. Although the fish came from Washington, Oregon, and California, the majority came from Washington State stocks.

Chinook: 77.4% of the Canadian fish came from Vancouver Island stocks with the majority of these, 59.7%, coming from the Conuma Hatchery.

Chinook: USA fish again had quite a diversity varying from 1 to a 5 count with Washington stock leading, followed by Oregon and California.

Bottom line to this scientific information is that we in Esperanza Sound Area 25 and offshore 125 enjoy a tremendous variety of stock that pass litterly on the door step of our area in a constant stream from June through September. It also clearly indicates the importance of the Conuma Hatchery and other BC westcoast river systems.

*Brandon and Vanessa Nelson
"lots of bottom fish coming in!"*

*Helen, Titan and Stan Leete "The springs just
keep coming!"*

Although the number of tagged fish may seem small they are extrapolated by many hundreds of thousands of fish passing by and are a true representation of the fish stocks.
